VRINDAVAN LANDSCAPE & ECOLOGICALSOLUTIONS

Green Audit 2022-23

### 6. BIODIVERSITY STATUS OF THE CAMPUS

Biodiversity describes the richness and variety of life on earth. It is the most complex and important feature of our planet. Without biodiversity, life would not sustain.

#### What is urban biodiversity?

Urban biodiversity is the variety and abundance of life in a city (Puppim de Oliveira et al. 2014). Urban nature refers to all life in a city, including expansive and relatively wild green and blue spaces, as well as gardens, green roofs, street trees, birds, and butterflies (Turini and Knop 2015). Different elements of urban nature can be home to different types and amounts of biodiversity. For example, a city park with forested trails, a stream, and a pond may be rich in urban biodiversity because it is home to many types and large numbers of trees, birds, frogs, fish, and beneficial microbes.

#### Importance Of biodiversity

Biodiversity is essential for the processes that support all life on Earth, including humans. Without a wide range of animals, plants and microorganisms, we cannot have the healthy ecosystems that we rely on to provide us with the air we breathe and the food we eat. And people also value nature of itself.

Conscious thought about energy conservation is inculcated in the minds of students with the display of switching off electrical devices when exiting the class.

Additionally, the office maintains the AC remotes. Once we leave the office the Ac is switched off again

**3. Using E- Resources** - Library has access cum subscriptions to many E-learning resources for the use of students and faculties minimizing the usage of the hard copies.
